What our customers say

"Brilliant product, isn't sticky like other lubricants. Makes sex so much more enjoyable."

Ann, Sept 2019

"I found this product very easy to use, it worked well to stop the soreness and it did not take long to work".

Hilary, Jan 2020

"I previously suffered from cancer and had treatment when I was only 28. At 33 I have struggled with intimacy issues since. Have tried previous lubricants which were no good and was fed up of buying ones that didn't help much.

However, since trying your free sample, I went to Boots and bought the full size bottle. Me and my husband were both impressed and really glad to find something that actually works! Thank you so so much for the free sample to try your amazing product. We love it!"

"Many women are too embarrassed to talk about vaginal dryness – only a third of women seek medical help. However, it's relatively straightforward to treat; over the counter moisturisers and lubricants can make all the difference. In more severe cases, a prescription for topical oestrogen and/or HRT may be required."
